

Tired of Bad Quality Welding from your Vendors?

Too many pits, porosity and hard spots?

Are your jobs late each and every time?

Is your welder taking too many shortcuts? No pre-heating, no post-heating, improper stress relieving and poor decision making on crack removal? What's next?

Can you afford to use "short cut" sources with poor quality and late deliveries?

How long can you tolerate this?

STELLAR FORGE PRODUCTS is the largest die sinking facility and captive shop. In 2006, we invested over \$200,000 in our plant facilities with all new welding equipment. We took this step because we were tired of being let down.

No down time and savings are the benefits of the extended die life of your impressions, shanks, rams, sow blocks, etc.

There will be less of a need for die replacements, minimum die prep and peace of mind that you have a great quality welder in place.

You expect the best - come to the **BEST**. **STELLAR FORGE PRODUCTS** is your premier die welder!
