

STELLAR FORGE PRODUCTS WELDING DIVISION

The marketplace has changed.

Non-traditional threats to your production runs have been identified. Poor outside welding standards have taken its toll from years of neglect. Working to meet a budget does control spending, but leaves you undermanned and forces you to accept less value. These are factors that contribute to higher costs in the end.

Be proactive: Don't short step your repairs to save a dollar now when it will cost you thousands down the road.

Be responsive: Set up a quick turn rotation of tooling to give yourself the reserves to react to any unforeseen problems at the forge.

Be adaptable: Keep open communications with SFP, your premier welder; give them every opportunity to help you do your job.

Stellar Forge Products leads the forging industry with solutions to every situation experienced by our hammer and press customers. We have experienced and certified forge welders, customer service that is unmatched and round-the-clock services to meet all of your welding needs. Whether it is quick weld repairs, implementing engineering changes, hard face welding, flood welding or extending die life, we have the program for you. Give yourself every opportunity to succeed in this new global market. Trust your instincts. Partner up with the most innovative company in the forging industry.

SFP-Stellar Quality!
